BSc in Computer Science – Dijlah University College (2019 – 2023)

TECHNICAL SKILLS

- Hardware & Software Troubleshooting
- Operating Systems Support
- System Installation and Configuration
- TCP/IP, LAN, WAN Networking Basics
- Basic Network Troubleshooting
- Help Desk & End-User Support
- Technical Documentation & Reporting

PROJECTS

Speaker Gender Recognition for Human-Computer Interaction

Speaker Gender Recognition is an AI-based system that analyzes voice signals to determine the speaker's gender, enhancing human-computer interaction in applications such as voice assistants and customer service systems. The project utilizes artificial intelligence and deep learning techniques using Python and TensorFlow. Key challenges addressed include accent variation, background noise, and recording quality, highlighting the need for robust algorithms and larger datasets to improve accuracy.

Enjaz – Electronic Archiving & Administrative Correspondence System

Enjaz is a comprehensive electronic archiving and administrative correspondence management system developed using modern web technologies (React.js and Node.js). The system was successfully implemented for a governmental service institution to organize incoming and outgoing correspondence workflows, manage committees and institutions, and streamline administrative processes. It provides analytical dashboards and detailed reports to support informed decision-making, features full Arabic language support, and includes a responsive design suitable for different devices.

Sumer Sales Management System

An advanced open-source business management system developed with Python and Django, tailored for diverse commercial environments including supermarkets, retail stores, pharmacies, and restaurants. The system fully automates daily operations—from inventory management to sales processing—ensuring data accuracy, operational efficiency, and reduced human error.

ORGANIZATIONS

GDSC Mentor – Dijlah University | 2023–2024

- Provided guidance to student developers.
- Supported event planning and technical training.

Google Developer Student Clubs | 2022 - 2023
